**(100) Service Quality Improvement Reporting
Data Collection Form**

FCC Form 481
OMB Control No. 3060-0986/OMB Control No. 3060-0819
July 2013

<010>	Study Area Code	290561
<015>	Study Area Name	CROCKETT TEL CO
<020>	Program Year	2016
<030>	Contact Name - Person USAC should contact regarding this data	Veronica Martin
<035>	Contact Telephone Number - Number of person identified in data line <030>	5013549070 ext.
<039>	Contact Email Address - Email Address of person identified in data line <030>	FillingRAD@tcc.com
<110>	Has your company received its ETC certification from the FCC? If your answer to Line <110> is yes, do you have an existing §54.202(a) "5 year plan" filed with the FCC?	(yes / no) <input checked="" type="radio"/> (yes / no) <input type="radio"/>
<111>		(yes / no) <input type="radio"/> (yes / no) <input type="radio"/>

If your answer to Line <111> is yes, then you are required to file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

<112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

290561-TN-112.pdf

Name of Attached Document

Please select the appropriate responses below (Yes, No, Not Applicable) to confirm that the attached document(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to §54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

<113>	Maps detailing progress towards meeting plan targets	Yes
<114>	Report how much universal service (USF) support was received	Yes
<115>	How much (USF) was used to improve service quality and how support was used to improve service quality	Yes
<116>	How much (USF) was used to improve service coverage and how support was used to improve service coverage	Yes
<117>	How much (USF) was used to improve service capacity and how support was used to improve service capacity	Yes
<118>	Provide an explanation of network improvement targets not met in the prior calendar year.	Yes

Five-Year Network Improvement Plan and Progress Report
For Crockett Telephone Company, Inc.

In its *USF/ICC Transformation Order* and subsequent Orders, the Federal Communications Commission (“FCC” or “Commission”) required Eligible Telecommunications Carriers (“ETCs”) to submit a five-year build-out plan in a manner consistent with Section 54.202(a)(1)(ii) of the Commission’s Rules by July 1, 2014 and to submit annual progress reports thereafter.¹ In its *March 5, 2013 Order*, the FCC specified that for rate-of-return carriers, the five-year plans “should describe the carrier’s network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories.”² Crockett Telephone Company, Inc. (“Crockett” or the “Company”) is a rate-of-return carrier ETC and hereby submits its five-year network improvement plan as well as a progress report covering any progress made on the initial five-year network improvement plan submitted in 2014. Because the 2015 calendar year is still in progress, 2015 is included in its five-year plan, but extends the plan for an additional year, through 2020. Therefore, while Crockett’s plan actually covers six calendar years, the five-year plan maintains a full five calendar years of forward-looking network improvement projects.

I. The Company's Five-Year Network Improvement Plan

When the Commission adopted its five-year plan requirements for FCC-designated ETCs in its *2005 ETC Order*, it set forth the following criteria as to how the ETC is to describe with “specificity” the proposed improvements or upgrades to the ETC’s network throughout its service area:

(1) how signal quality, coverage, or capacity will improve due to the receipt of high-cost support throughout the area for which the ETC seeks designation; (2) the projected start date and completion date for each improvement and the estimated amount of investment for each project that is funded by high-cost support; (3) the specific geographic areas where the improvements will be made; and (4) the estimated population that will be served as a result of the improvements.³

In that order, the FCC clarified that service quality improvements in the five-year plan “do not necessarily require additional construction of network facilities.”⁴ Accordingly, the improvements listed in the plan may be projects related to the expansion of the network (one or multiple services), projects related to updating technology to accommodate new services or higher bandwidth or maintenance projects, such as to reduce trouble reports or replace outdated equipment. Additionally, in some cases, the projects may be ones that improve or upgrade the entire network rather than discrete areas within a study area or they may be ones that are ongoing projects that have no specific start and completion dates.

The instructions to the Form 481 state “[r]ecipients may describe where improvements are expected to occur by wire center or census block, as appropriate. To the extent no

³ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

⁴ *Id.*

improvements are planned in specific areas, the five-year plan should so indicate.”⁵ The instructions also require that in subsequent annual progress reports, which must include the total amount of universal support received, this information must be provided “broken out separately by the amount spent on capital expenses and the amount spent on operating expenses.”⁶ Accordingly, the Company’s five-year plan separately provides both capital expenditures and operating expenses.

A. The Company’s Major Network Improvement Projects

Based upon this framework, Appendix A updates the Company’s five-year plan submitted in 2014 and reflects Crockett Telephone Company, Inc.’s major network improvement projects for the six calendar years 2015 through 2020⁷ along with the start and completion dates, capital costs, areas and population associated with those projects.

B. How These Projects Will Improve the Network

In 2015-2019 Crockett has planned projects to expand its fiber network in order to increase speed and reliability of both broadband and traditional telephone services within its network. The two projects are both scheduled in 2016. The first is a fiber build-out to the Alamo business district which will increase service reliability and provide greater bandwidth for the estimated 801 business owners and residents in the area. The second project in 2016 will be the addition of the Curtis remote to the Alamo exchange this will expand the current service area broadband access reaching an estimated 162 residents with speeds of 4mbps/1mbps or higher.

⁵ Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112.

⁶ Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112.

⁷ Based upon informal discussions with the FCC, the initial five-year network improvement plan covered calendar years 2015 through 2019.

Ongoing projects include central office power upgrades that will insure network reliability during outages. Various other upgrades during this time include building improvements, new computers, new vehicles, and other work equipment; these will be used to replace outdated equipment and address maintenance issues. Crockett requires all batteries be tested regularly to insure reliability of the network under emergency situations, which means regular battery replacement throughout the five years. Routine outside plant upgrade projects will be regarded as the normal course of business for maintaining plant facilities and the network. Finally there will be various broadband upgrades and central office power upgrades. These projects will help to expand the network and update technology to allow higher broadband internet bandwidth speeds. See Appendix A for a full breakdown including costs of the various projects.

C. Estimated Capital Expenditures and Operating Expenses

The first table in Appendix B included herein specifies the capital expenditures (projects) in Appendix A, by Part 32 account, along with the respective year in which the expenditures are expected to occur. In the second table of Appendix B, the projected operating expenses are provided, including depreciation expense for both embedded plant investment and for capital expenditures, which begins when the capital expenditures are projected to be placed into service.

II. The Company's Progress Report on its Five-Year Network Improvement Plan

Because the calendar year 2015 is still under way, Crockett Telephone Company, Inc. has no progress to report on the network improvement projects planned for 2015. Comprehensive progress made on network improvements in 2015 will be reported by Crockett Telephone Company, Inc. in its 2016 ETC Annual Report. Crockett Telephone Company, Inc. hereby

provides the following required elements of its progress report to satisfy Form 481 reporting obligations.

A. The Amount of Universal Service Support Received by the Company

For the 2014 calendar year, which was outside of the scope of the Company's initial five-year network improvement plan, Crockett Telephone Company, Inc. received a total of \$346,638 in high cost universal service support ("USF") through the following mechanisms:

- [REDACTED] for Interstate Common Line Support ("ICLS");
- [REDACTED] for High Cost Loop Support ("HCLS");
- [REDACTED] for ICC CAF Support;

B. How Crockett Telephone Company, Inc. Has Used USF to Improve Service Quality, Coverage and Capacity

Section 254(e) of the Communications Act of 1934, as amended requires ETCs to use Universal Service support ("USF") "only for the provision, maintenance, and upgrading of facilities and services for which the support is intended."⁸ Pursuant to Section 54.314 of the FCC's rules, in order for state-designated ETCs to receive USF for the coming year, states must annually file certifications by October 1 stating that all federal high-cost support provided to such carriers within the state "was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended."⁹ ETCs not designated by a state must file similar certifications with the FCC.¹⁰

⁸ 47 U.S.C. § 254(e).

⁹ 47 C.F.R. § 54.314(a).

¹⁰ 47 C.F.R. § 54.314(b).

In its *USF/ICC Transformation Order*, the FCC clarified that prior to making the Section 254(e) certifications, states should conduct a “rigorous examination of the factual information” contained in the annual Section 54.313 reports, of which the five-year network improvement plan and annual progress reports are a part, in determining whether they can certify that carriers’ support has been used and will be used only for the purpose for which the support was intended.¹¹ The FCC said that it would also use the reports to verify certifications filed by ETCs that are not state-designated.¹² In this context, the Commission stated, “[i]n light of the public interest obligations we adopt in this Order, a key component of this [Section 254(e)] certification will now be that support is being used to maintain and extend modern networks capable of providing voice and broadband service.”¹³

Essentially, under the existing rules and processes, the federal USF received by the Company and other incumbent rural telephone companies are, in fact, an integral part of the recovery of expenditures of rural incumbent local exchange carriers incurred in the provision, maintenance and upgrading of their provision of facilities and services for which the USF is intended. Crockett depends upon its receipt and utilization of federal universal service support to provide rural telephone customers with affordable and quality voice and broadband services.

Accordingly, given the critical role the network improvement plan as updated herein and the progress reports will have in the annual Section 254(e) certification process, Crockett’s plan and progress reports demonstrate how the Company has used and will use USF not only for improvements and upgrades, but also for the provision and maintenance of the

¹¹ See *USF/ICC Transformation Order* at Para. 612.

¹² *Id.*

¹³ *Id.* (emphasis supplied).

facilities and services to which the support was intended. Even though the FCC did not require the Company to include calendar year 2014 as part of the Company's network improvement plan and thus there is no information to report regarding progress during that year, the Company hereby certifies that during that year it used USF solely for which the support was intended.

C. Maps Depicting the Company's Network Progress

Attached to this Five-Year Network Improvement Plan as Appendix C is Crockett's map depicting the extent of the Company's network within its service area and indicating specific geographic areas associated with certain projects listed above.

D. Network Improvement Targets Not Met

Because 2015 is the first year of the Company's network improvement plan, there is no previous year for which to report network improvement targets that have not been fulfilled. The Company will report such information for calendar year 2015 as well as progress towards meeting its targets for that year in its progress report submitted in 2016.

Appendix C.
Crockett Telephone
Company, Inc.

Crockett Telephone Company, Inc.'s demonstration of complying with applicable service quality standards and consumer protection rules:

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The Commission found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

Crockett Telephone Company, Inc. (“Company”) hereby certifies that it is complying with applicable service quality standards and consumer protection rules. The Company is subject to consumer protection obligations under state law. These obligations include, but are not limited to, the following: (1) filing a Local Exchange Tariff pursuant to the Rules of Tennessee Regulatory Authority, Chapter 1220-4-1-.03 and the Tennessee Code Annotated, Title 65, Chapter 5, Part 1, §65-5-102, which disclose rates, terms and conditions of service to customers; (2) adherence to state consumer protection requirements governing telephone providers which require

¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

² *Id.* at para. 28.

³ *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

⁴ *Id.* at n. 72.

implementation of Basic Utility Obligations in accordance with the Rules of Tennessee Regulatory Authority, Chapter 1220-4-2-.29, Consumer Safeguards as identified in the Rules of Tennessee Regulatory Authority, Chapter 1220-4-2-.55, anti-slamming procedures as required in the Rules of Tennessee Regulatory Authority, Chapter 1220-4-2-.56; (3) truth-in-billing requirements in accordance with the Rules of Tennessee Regulatory Authority, Chapter 1220-4-2-.58; and (4) CPNI, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy.

Crockett Telephone Company, Inc.'s Ability to Function in Emergency Situations

Crockett Telephone Company, Inc. ("Company") hereby certifies that it is able to function in emergency situations as set forth in Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.202(a)(2)¹ and Rules of the Tennessee Regulatory Authority, Chapter 1220-4-2. The Company's network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can change call routing translations as needed to reroute traffic around damaged facilities within company exchanges. Changing call routing translations will also allow the Company to manage traffic spikes throughout its network, as emergency situations require. The Company does not have an alternate path of egress and therefor is reliant on a single meetpoint for broadband and voice network availability outside the local exchange carrier's boundary.

The Company has an agreement with Crockett County 911 to make the Emergency Management Authority building that neighbors the Alamo Central Office a secondary 911 dispatch location. The Company will re-route 911 traffic to the secondary location in the event that the primary 911 facility cannot be reached. If the Company is unable to deliver 911 calls through the normal path to the PSAP, the Company would re-route calls to appear on the administrative lines at the 911 center's primary location.

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."

In accordance with the Rules of Tennessee Regulatory Authority, Chapter 1220-4-2, 1220-4-2-.23 Emergency Operation, the Company's central offices have adequate provision for emergency power. Specifically, each central office building is supplied with standby generators and battery back-up that enable the central office to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic.

Voice Services Rate Comparability**Crockett Telephone Company, Inc.'s calculation for rate floor certification:**

Crockett Telephone Company, Inc. (Crockett) certifies that its pricing of fixed voice services is no more than two standard deviations above the applicable national average urban rate floor for voice services. Crockett calculates the average local voice rate using the following formula:

Local Rate + State SLC + State USF + Mandatory EAS

The local rate for Crockett's customers is \$16.00, there is no state SLC or USF and no mandatory EAS. Based on the formula above, Crockett Residential rates are \$16.00, well below the threshold of \$47.48 set by the Wireline Competition Bureau.

Progress Report

Because 2015 is the first year of the Company's network improvement plan, there is no previous year for which to report network improvement targets that have not been fulfilled. The Company will report such information for calendar year 2015 as well as progress towards meeting its targets for that year in its progress report submitted in 2016.

INDEPENDENT AUDITORS' REPORT

Board of Directors
Crockett Telephone Company, Inc.
Friendship, Tennessee

Report on the Financial Statements

We have audited the accompanying financial statements of Crockett Telephone Company, Inc. (a majority-owned subsidiary of Telephone Electronics Corporation – the Company), which comprise the balance sheets as of December 31, 2014 and 2013 and the related statements of operations, changes in stockholder's equity and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

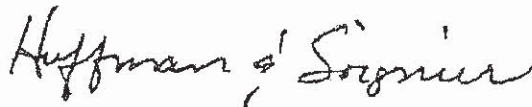

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2014 and 2013, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

In accordance with *Government Auditing Standards*, we have also issued our report dated April 30, 2015 on our consideration of the Company's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in conjunction with this report in considering the results of our audit.

CROCKETT TELEPHONE COMPANY, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2014 AND 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General

Crockett Telephone Company, Inc. (the Company) is a majority-owned subsidiary of Telephone Electronics Corporation (TEC).

Nature of Operations

The Company's principal line of business is the provision of a broad range of communications services to business and residential customers located primarily in western Tennessee. The Company views, manages and evaluates the results of its operations from the various communications services as one company, and therefore, has identified one reporting segment as it relates to providing segment information.

Regulatory Accounting

The Company follows the accounting for regulated enterprises prescribed by Accounting Standards Codification (ASC) 980, "*Regulated Operations*", including certain accounting practices prescribed by the Federal Communications Commission (FCC) and the Tennessee Regulatory Authority (TRA). The standard system of accounts for the Company is the FCC's Part 32 Uniform System of Accounts. This accounting recognizes the economic effects of rate regulation by recording costs and a return on investment; as such, amounts are recovered through rates authorized by regulatory authorities. Accordingly, ASC 980 requires the Company to depreciate regulated communications plant over the useful lives approved by regulators, which could be different than the estimated useful lives that would otherwise be determined by management. Criteria that would give rise to the discontinuance of accounting in accordance with ASC 980 include increasing competition which may restrict the ability of the Company to establish prices that allow it to recover specific costs and significant changes in the manner in which rates are set by regulators from cost-based regulation to another form of regulation. The Company periodically reviews the criteria to determine whether the continued application of ASC 980 is appropriate.

The Company is subject to reviews and audits by regulatory agencies. There were no reviews or audits during 2014 and 2013.

Revenue Recognition

Revenue is recognized when evidence of an arrangement exists, the earnings process is complete and collection is reasonably assured. The Company's revenues are primarily derived from: local calling services, interstate and intrastate access revenues (including pooled revenues), Connect America Fund (CAF) support, Internet and data services, long distance services and other miscellaneous services.

The Company markets competitive service bundles which may include multiple deliverables. The Company offers an unlimited statewide calling bundle and an unlimited nationwide calling bundle that consist of voice services, calling features and long distance. Revenues are allocated to the separate units based on their estimated fair values.

Substantially all recurring non-usage sensitive service revenues, including service bundles, are billed in advance and deferred until earned. The Company records revenue billed in advance as advance billings. Non-recurring and usage sensitive revenues are billed in arrears and recognized when earned.

As the result of a new tariff filed with the TRA in July 2014, the Company increased its residential local service rates to \$16 from the existing rate of \$14 effective November 1, 2014. Also in March 2013, the Company filed a tariff with the TRA to increase its residential local service rates to \$14 from the existing rate of \$10 effective April 1, 2013 and to increase its business local service rates to \$24 from the existing rate of \$19.41 effective May 1, 2013.

Network access and miscellaneous revenue is derived from several sources, including CAF support, interstate and intrastate access revenues, as well as intrastate long distance revenues, and is detailed as follows:

	<u>2014</u>	<u>2013</u>
CAF support		
Interstate/intrastate access		
Intrastate long distance		
Directory services		
Miscellaneous		
Uncollectible		

Revenue for interstate access services is received through tariffed access charges filed by the National Exchange Carrier Association (NECA) with the FCC on behalf of the NECA member companies. These access charges are billed by the Company to interstate interexchange carriers and reported to NECA to be pooled with like-revenues from all NECA member companies. A portion of the pooled access charge revenues are distributed to the Company based upon its actual cost of providing interstate access service, plus a return on the investment dedicated to

providing that service. Distributions from these pools can change relative to changes made to expenses, plant investment, or rate of return. Intrastate revenue is derived from tariffed access charges as filed with the TRA. These access charges are billed to the interexchange carriers and payments are retained by the Company. On October 7, 2014, the Company entered into a settlement agreement with AT&T Mobility regarding the exchange of IntraMTA tariff. In connection with this settlement, the Company recognized income of [REDACTED] during 2014, which is reflected within "Toll settlement adjustments – net" on the accompanying statements of operations. The Company also recorded adjustment of prior years intrastate and interstate access costs of [REDACTED] during 2014 and [REDACTED] during 2013, which are reflected within "Toll settlement adjustments – net" on the accompanying statements of operations. Estimated interstate revenues are initially recorded based on cost studies which require final approval by NECA and the FCC. It is believed that the recorded amounts in 2014 approximate the final amounts which will be determined when pool cost studies are finalized; however, these estimates are subject to adjustment in future accounting periods as additional operational information becomes available. The Company recognized a reduction in revenue in the amount of [REDACTED] and [REDACTED] during 2014 and 2013 as a result of the 2013 and 2012 pools being finalized.

The FCC has issued a Report and Order and Further Notice of Proposed Rulemaking ("Reform Order"). The Reform Order contains comprehensive rules reforming all forms of intercarrier compensation and implements a new support mechanism for the deployment of broadband services. Generally, the intercarrier compensation reform outlines a path toward a "bill & keep" method where there is no compensation for termination of traffic received from another carrier. The transition to this method includes numerous steps depending on the type of traffic exchanged. In July 2014, the Company began reducing its terminating access and reciprocal compensation rates over 7 years to "bill & keep". The Company receives CAF support, which is a support mechanism designed to replace some of the Company's lost access revenue during the transition period outlined in the Reform Order. In April 2014, the Company received a notice from NECA regarding excess CAF support received during the period July 2012 – December 2013. After discussions with NECA, the Company accepted the adjustment and recognized a reduction in 2014 CAF support of [REDACTED]

The Company recognizes directory services revenue over the subscription period of the corresponding directory. Directory services are normally billed under contract.

Nonregulated communications revenues are derived primarily from Internet and data services, long distance services, inside wire maintenance (ISW Maintenance) and Voice over Internet Protocol communications services (VoIP), and are detailed as follows:

	<u>2014</u>	<u>2013</u>
Internet and data services		
Interstate/international long distance		
ISW Maintenance		
VoIP		
Miscellaneous		
Uncollectible		

Receivables for network access revenues are reflected (net of payables) as “Accounts receivable – Toll settlements” for 2014 and as “Accounts payable – Toll settlements” for 2013 on the accompanying balance sheets.

Property, Plant and Depreciation

Regulated communications plant is stated substantially at original cost of construction and includes indirect costs consisting of payroll taxes, pensions and other fringe benefits, and supervision salaries. Net composite interest charges on borrowed and equity funds used to finance construction are capitalized in the same manner as construction labor and material costs. Interest is capitalized to the extent allowed by regulatory agencies. No interest was capitalized in 2014 and the Company capitalized interest in the amount  during 2013.

Generally, for regulated communications plant, normal asset retirements are charged against accumulated depreciation along with the cost of removal, less salvage, with no gain or loss recognized. The unrecovered costs of regulated communications plant removed substantially in advance of the expected service life of the plant (extraordinary retirements) are deferred and amortized over a period of years specified by the appropriate regulatory commission. There were no extraordinary retirement balances as of December 31, 2014 and 2013.

Depreciation of regulated communications plant is provided on the straight-line method, using class and overall composite rates subject to approval by the TRA.

When nonregulated communications plant is sold or retired, the original cost and accumulated depreciation are removed from the accounts and any gain or loss is included in the results of operations. Depreciation on nonregulated communications plant is determined using the straight-line method for financial reporting purposes.

Expenditures for improvements that significantly add to the productive capacity or extend the useful life of an asset are capitalized. Expenditures for maintenance and repairs to all property, plant and equipment, as well as replacement of minor items, are charged to maintenance expense as incurred.

Materials and Supplies

The Company maintains an inventory of telephones, cable, modems and equipment repair parts as well as maintaining an inventory for resale of telephones and computer accessories. Materials and supplies are stated at the lower of cost or market value. Cost is determined using the moving average method of valuation. The Company reviews inventory on an annual basis for obsolescence and records charges based upon various factors, including the age of the inventory and technological advances. The Company has provided a reserve for obsolete inventory of [REDACTED] and [REDACTED] at December 31, 2014 and 2013, respectively.

Income Taxes

The Company is included in the consolidated federal income tax return of TEC. For financial reporting purposes, income taxes are generally calculated and settled as though the Company had prepared a separate tax return except that the statutory income tax rate for TEC is applied.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of assets and their respective tax bases and operating loss and tax credit carryforwards.

To the extent current year income tax accruals are paid or offset by other transactions with TEC, they are considered as cash paid for income taxes.

Interest and penalties related to income tax matters are recognized in Nonoperating Income (Expense). During 2014 and 2013, the Company had no significant amounts recorded for interest and penalties.

The Company is subject to income tax examinations by the IRS and the Tennessee Department of Revenue; however, there are currently no examinations in progress for any tax periods. Management believes the Company is no longer subject to income tax examinations for years prior to 2011.

Recently Adopted Accounting Pronouncements

In July 2013, the Financial Accounting Standard Board ("FASB") issued Accounting Standards Update ("ASU") 2013-11, which is designed to reduce diversity in practice of financial statement

presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss or a tax credit carryforward exists. This new guidance became effective for the Company on January 1, 2014. The adoption of this update did not have a material impact on the Company's financial position or results of operations.

Recently Issued Accounting Pronouncements

During 2014, the FASB issued ASU 2014-01 through ASU 2014-18. Except for ASU 2014-09, which is discussed below, these ASUs primarily provide technical corrections to existing guidance, relate to specialized industries or relate to accounting issues that are not applicable to the Company. Accordingly, these ASUs will not have a material impact on the Company's financial position or results of operations.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which is designed to clarify the principles used to recognize revenue for entities. The accounting guidance defines how companies report revenues from contracts with customers, and also requires enhanced disclosures. The guidance becomes effective for the Company on December 31, 2019 and allows for two methods of adoption: (1) "full retrospective" adoption, meaning the standard is applied to all periods presented, or (2) "modified retrospective" adoption, meaning the cumulative effect of applying ASU 2014-09 is recognized as an adjustment to the fiscal year 2019 opening retained earnings balance. The Company is evaluating the potential impact of this pronouncement.

Cash, Cash Equivalents and Cash Investments

The Company considers highly liquid investments (including the Company's interest in a consolidated cash management account maintained by a subsidiary of TEC (see Note 2)) with an original maturity of three months or less to be cash equivalents. Certificates of deposit with an original maturity greater than three months, but less than or equal to one year are considered to be cash investments.

Disclosures About Concentrations

The Company is subject to credit risk primarily through cash and cash equivalent balances and trade receivables.

The Company's cash and cash equivalents are primarily invested in a master cash management pool with other TEC affiliates (see Note 2). The overall pooled cash balances are currently invested in mutual funds, consisting primarily of U.S. government agency and treasury securities, as well as overnight repurchase agreements. The risk of loss on such investments is remote.

The Company believes that the concentration of credit risk with respect to trade receivables is principally related to receivables due from other interexchange carriers for network access revenues, which are reflected within "Accounts receivable – Toll settlements" for 2014 and "Accounts payable – Toll settlements" for 2013, and the amounts due from underlying customers for local, internet and data services which are reflected within "Accounts receivable – Customers" on the accompanying balance sheets. Overall, the Company believes that such credit risk is minimized because charges for local, internet and data services are typically billed in advance of the actual communications services being rendered, and charges for toll services provided by long distance carriers other than the Company and not collected from the Company's underlying customers are recoverable from the associated long distance carriers.

Accounts Receivable and Allowance for Doubtful Accounts

The Company extends credit to its business and residential customers generally on an unsecured basis. Service interruption is the primary vehicle for controlling losses. Trade and toll settlement receivables are accounted for at cost less the reserve for uncollectible accounts. The allowance for doubtful accounts on trade receivables is computed by management and is the Company's best estimate for the amount of probable losses on the Company's existing accounts receivable. The allowance for doubtful accounts is calculated excluding the long distance portion of the receivable, for carriers other than the Company, due to the fact that this portion is recoverable in full from the associated long distance carrier. The allowance for doubtful accounts for toll settlements is calculated using the specific identification method whereby management assesses a carrier's ability to meet its current financial obligations to the Company. Management's assessment includes the overall length of time the receivable has been past due, historical collection experience, and other factors. As of December 31, 2014 and 2013, the Company has provided a reserve for delinquent toll settlements of [REDACTED] and [REDACTED], respectively.

Customers are typically billed on the 1st of every month and the accounts are considered delinquent if not paid in full by the 15th of the month. Late fees are billed at the tariffed rate filed with the TRA and are recorded as income when billed. Customer accounts are typically disconnected if payment is not received by the 25th of the respective month. Normally, uncollectible trade receivables are written off against the allowance for doubtful accounts sixty days after the date of disconnection. Subsequent recoveries of customer receivables are recognized as income in the period such amounts are actually received.

Advertising

Costs incurred for producing and communicating advertising are expensed as incurred.

Taxes Collected from Customers and Remitted to Governmental Authorities

The Company records taxes billed to its customers and remitted to governmental authorities on a net basis within a liability account.

Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The estimates are reviewed periodically and, as adjustments become necessary, they are reported in the earnings of the Company in the period in which they become known.

Deferred Land Lease Costs

Lump sum payments to acquire long-term land leases are capitalized and amortized on the straight-line method over the terms of the underlying leases. The related expense is reflected within "Plant operations" on the accompanying statements of operations.

Investments

Investments in nonconsolidated companies in which the Company has a 20% to 50% interest or otherwise has the ability to exercise significant influence over the operating and financial policies are accounted for using the equity method. Investments in which there is no significant influence (normally less than a 20% ownership) are accounted for under the cost method of accounting.

To determine if an impairment of an investment exists, the Company monitors and evaluates the financial performance of the business in which it invests and compares the carrying value of the investee to quoted market prices (if available), or the fair values of similar investments, which in certain instances, is based on traditional valuation models utilizing multiples of cash flows. When circumstances indicate that a decline in the fair value of the investment has occurred and the decline is other than temporary, the Company records the decline in value as a realized impairment loss and a reduction in the cost of the investment.

Subsequent Events

The Company evaluated subsequent events and transactions for potential recognition or disclosure in the financial statements through April 30, 2015, which is the date the financial statements were available to be issued.

Reclassifications

Certain reclassifications have been made to conform 2013 amounts to 2014 classifications, none of which had a material effect on these financial statements.

2. AFFILIATED TRANSACTIONS

In the normal course of operations, the Company receives and provides certain services or engages in transactions with TEC and/or certain subsidiaries of TEC. The significant services and transactions with affiliated companies not discussed elsewhere are summarized as follows:

	<u>2014</u>	<u>2013</u>
Amounts incurred for assistance with billing and related services, provided by subsidiaries of TEC		
Amounts incurred for executive, managerial, technical, accounting, insurance, marketing, legal, service mark licensing, regulatory matters, revenue assurance, equipment purchases, and other miscellaneous services provided by TEC		
Amounts incurred for network transmission, network access, equipment and network maintenance, Internet bandwidth, equipment purchases and other miscellaneous services provided by subsidiaries of TEC		

The net balances due (to) from affiliated companies are reflected in the financial statements as follows:

	<u>2014</u>	<u>2013</u>
Accounts payable - Affiliates		
Amounts included in:		
Accounts receivable - Toll settlements		
Accounts payable - Toll settlements		
Accounts payable - Trade		

The following is a detail of the composition of the net balance due (to) from affiliates:

	<u>2014</u>	<u>2013</u>
TEC		
TEC Services, Inc.		
LecNet, Inc.		
TEC Services of Louisiana, Inc.		
West Tennessee Telephone Company, Inc.		
TEC of Jackson, Inc.		
Peoples Telephone Company		

The Company participates in a master cash management pool with other TEC affiliates administered by Regions Bank. The Company's main operating and payroll accounts draw from and are funded by an investment account maintained by another subsidiary of TEC. The Company receives an allocation of earnings, if any, and fees on the investment account on a monthly basis. The Company's share of the investment account is reflected in "Cash and cash equivalents" on the accompanying balance sheets and amounted to  for 2014, of which  has been committed to fund outstanding checks. The Company's share of the investment account for 2013 was  of which  was committed to fund outstanding checks.

3. RELATED PARTY TRANSACTIONS

During 2014 and 2013, the Company engaged in transactions with entities in which there is an ownership or involvement by an officer and director. The significant transactions are summarized as follows:

	<u>2014</u>	<u>2013</u>
Amounts incurred for engineering and other related services provided by a company owned or controlled by an officer and director of the Company		

Amounts payable to related parties at December 31, 2014 and 2013 were  and  respectively. These amounts are reflected in "Accounts payable - Trade" on the accompanying balance sheets.

4. INVESTMENTS

Investments consist of:

	<u>2014</u>	<u>2013</u>
Rural Telephone Finance Cooperative (RTFC)		

The Company's investment in RTFC is carried at historical cost due to no readily determinable fair market values for such instruments being available. The RTFC investment is comprised of patronage certificates that represent ownership in RTFC. This investment is being redeemed on an ongoing basis.

5. PROPERTY, PLANT AND EQUIPMENT

The major classes of property, plant and equipment and their respective depreciation rates are as follows:

	<u>Annual Rate Range</u>	<u>Asset Balance</u>
		<u>2014</u> <u>2013</u>
Regulated communications		
Land	-	
Buildings	3%	
Vehicles and other work equipment	13%	
Furniture and office equipment	8% - 25%	
Central office equipment	8%	
Circuit equipment	13%	
Poles	7%	
Cable, lines and wire	2% - 7%	
Other	13%	
Total regulated communications plant in service		
Regulated communications plant under construction		
Total regulated communications plant		
Nonregulated communications	20% - 33%	

Depreciation expense for property, plant and equipment amounted to [REDACTED] and [REDACTED] in 2014 and 2013, respectively. The composite depreciation rate for regulated communications property, plant and equipment was 4.28% for 2014 and 4.36% for 2013.

Substantially all of the Company's regulated and nonregulated communications property, plant and equipment is pledged to secure long-term debt.

6. LONG-TERM DEBT AND LINE OF CREDIT INFORMATION

Long-term debt consists of:

	<u>2014</u>	<u>2013</u>
5% mortgage notes payable to Rural Utilities Service (RUS), secured by a first mortgage on substantially all assets, due in quarterly installments of approximately [REDACTED] including interest, maturing in 2017		
5% mortgage note payable to RUS, also secured by a first mortgage on substantially all assets, due in monthly installments of approximately [REDACTED] including interest, maturing in 2022		
Current maturities		

The Company has an unadvanced remaining commitment from RUS in the amount of [REDACTED] at 5% interest, which if drawn would be amortized over the remaining life of the original loan described above.

Approximate aggregate annual principal payments applicable to long-term debt are as follows:

2015	
2016	
2017	
2018	
2019	
Thereafter	
Total long-term debt	

In addition, the Company is restricted from making advances, loans or extending credit to any stockholder or affiliated company without the consent of the noteholder. At December 31, 2014, the Company is in compliance with all such covenants. Further, as of December 31, 2014, approximately [REDACTED] of the Company's retained earnings were available for the payment of cash dividends under the most restrictive provisions of these agreements.

A loan agreement of TEC with RTFC contains certain restrictions which pertain to the Company, including restrictions on incurring additional indebtedness and transactions involving the Company's capital stock.

7. LEASES

The Company incurs pole rent expense under the terms of cancellable joint use pole rental agreements and pole attachment license agreements. Pole rent expense incurred under these agreements, which is reflected in "Plant operations" on the accompanying statements of operations amounted to [REDACTED] and [REDACTED] for 2014 and 2013, respectively. Under the terms of the joint use pole rental agreements the Company recorded pole rental revenue in the amount of [REDACTED] during 2014 and [REDACTED] during 2013, which is included in "Network access and miscellaneous" on the accompanying statements of operations.

The Company also leases land and other items under cancellable operating leases. Rent expense under these agreements amounted to [REDACTED] and [REDACTED] for 2014 and 2013, respectively.

8. INCOME TAXES

Income taxes were charged to operations as follows:

		<u>Regulated Communications Operations</u>	<u>Nonregulated Communications Operations</u>	<u>Total</u>
	2014			
Current				
Federal				
State				
Deferred				
Federal				
State				
	2013			
Current				
Federal				
State				
Deferred				
Federal				
State				

The following is a summary of the items which cause the effective tax rate based on pretax loss to differ from the statutory federal income tax rate:

	<u>2014</u>		<u>2013</u>
	<u>Amount</u>	<u>% of Pretax Income</u>	<u>Amount</u>
Computed "expected" federal income tax benefit			
State income tax expense (benefit), net of federal income tax effect			
Other - net			
Actual income tax benefit			

The tax effects of temporary differences that gave rise to the deferred tax assets and deferred tax liabilities, at December 31, 2014 and 2013, are as follows:

	<u>2014</u>	<u>2013</u>
Federal net operating loss carryforwards		
State net operating loss carryforwards		
Accounts receivable allowance		
Other - net		
Gross deferred tax asset		
Valuation allowance		
Net deferred tax assets		
Property, plant and equipment, primarily due to depreciation differences		
Deferred state income tax (for calculation of deferred federal income taxes)		
Total deferred tax liabilities		
Net deferred tax assets (liabilities)		

Deferred taxes are included in the financial statements as follows:

	<u>2014</u>	<u>2013</u>
Deferred tax assets - current		
Deferred tax liabilities - noncurrent		

At December 31, 2014, there were federal net operating loss carryforwards of [REDACTED] which will expire between 2029 and 2031. Also, at December 31, 2014, there were state net operating loss carryforwards of [REDACTED] which will expire between 2025 and 2029.

The valuation allowance for deferred tax assets increased [REDACTED] during 2014. The increase in the valuation allowance was the result of management's assessment that it is more likely than not

that the Company will not be able to realize the benefits of all or a portion of the state net operating loss carryforwards in future periods.

9. PREFERRED STOCK

The Company has issued 538 shares of [REDACTED] par, 5% cumulative, non-voting preferred stock, of which 525 shares are outstanding. TEC owns 513 of the outstanding shares and the remaining shares are held by unrelated individuals. There is no stated redemption date for the preferred shares. At December 31, 2014 and 2013, there were no dividends in arrears.

10. EMPLOYEE BENEFIT PLANS

Employee Stock Ownership Plan (ESOP)

TEC sponsors an ESOP that covers substantially all employees with one year or more of service with a participating company. Participating companies include TEC and its subsidiaries (including the Company). This plan is funded by participating company contributions determined annually by TEC's Board of Directors. The Company contributed [REDACTED] during 2014 and [REDACTED] during 2013 to the ESOP, which is reflected as compensation expense.

Employee 401(k) Plan

The Company is included in the Telephone Electronics Corporation and Associated Companies 401(k) Plan (the 401(k) Plan). Participating employees may contribute a portion of their compensation to the 401(k) Plan, and the Company, at its discretion, makes matching contributions based on the employee's contribution. Participation in the 401(k) Plan is open to employees who have attained the age of 21 and completed one year of service (as defined under the 401(k) Plan). Currently, the Company makes safe harbor matching contributions of 100% of the first 3% of employee compensation contributed to the 401(k) Plan and 50% of the next 2% of employee compensation contributed to the 401(k) Plan. Total matching contributions recognized by the Company were [REDACTED] and [REDACTED] for 2014 and 2013, respectively.

11. COMMITMENTS AND CONTINGENCIES

Construction expenditures and other investments in property, plant and equipment are currently estimated to be [REDACTED] during 2015; however, this estimate may be revised for changes in funding availability.

12. CONCENTRATIONS, RISKS AND UNCERTAINTIES

The Company's business is conducted primarily in western Tennessee and, accordingly, is dependent upon the general economic conditions of this region. Although the Company's performance is affected by the general conditions of the economy, not all of its services are equally affected. There can be no assurance that future economic conditions in this region will not impact demand for services, which may impact the Company's business, operating revenues and cash flows.

The Company also faces certain inherent risks that its service area can experience significant weather events which have the potential to physically damage its overall telecommunications infrastructure. Such disruptions may cause interruptions in service or reduced capacity for customers on a short-term basis and cause the Company to incur certain non-recurring expenses which may or may not be recoverable under the provisions of insurance policies.

The Company faces potential competition from wireless carriers, competitive local exchange carriers and other providers of telecommunications and information services. Certain competitors benefit from financial, personnel, marketing and other resources that are significantly greater than the Company's available resources. These competitors may provide services competitive with products and services the Company provides or intends to provide. However, as a "rural telephone company", the Company is currently exempt from the obligation to lease network elements in an unbundled manner to competitive local exchange carriers and to comply with certain other requirements applicable to larger incumbent local exchange carriers. This relief may be lost if certain actions are taken by competitors or regulatory bodies.

Approximately 44% of the Company's total combined revenues for the years ended December 31, 2014 and 2013 were derived from network access charges and CAF support. The interstate network access rates that the Company can charge are regulated by the FCC, and the intrastate network access rates are regulated by the TRA. Those rates may change from time to time.

In early 2010, the FCC released its new National Broadband Plan (the Broadband Plan). The Broadband Plan is the FCC's framework to develop a comprehensive plan over the next decade for broadband deployment, intercarrier compensation reform and regulatory reform initiatives, such as reformation of the Universal Service Fund (USF) High Cost Loop Fund (HCL). Subsequently, the FCC issued the Reform Order which addressed both intercarrier compensation as well as USF support issues. The Reform Order was accompanied by a Further Notice of Proposed Rulemaking seeking comment on a range of follow up proposals. The Reform Order is also the subject of numerous Petitions for Reconsideration, which ask the FCC to reconsider portions of its decision, and is the subject of judicial appeals. Future judicial challenges to the Reform Order are also possible, which could alter or delay the FCC's proposed changes. The Company cannot predict the outcome of any future rulemaking, reconsideration and legal

challenges and as a consequence, the impacts these may have on the Company; however, the Reform Order may have a negative impact on the Company's revenues.

The Reform Order establishes a \$2 billion fund that is intended to maintain existing levels of support in the aggregate while at the same time transitioning support mechanisms so that, over time, rate of return carriers receive support for the deployment of wireline broadband facilities principally through the CAF rather than through the intercarrier compensation regime. To effectuate the first phase of this effort, the Reform Order established benchmarks that limit certain reimbursable capital and operating expenses for determining HCL support; reduces HCL support on a dollar-for-dollar basis where a carrier's local rates are set below a specified urban local rate floor; phases out Safety Net Additive support; eliminates local switching support; eliminates support for service areas that overlap with the service areas of others; and imposes a \$250 absolute cap on per line support. Although the Reform Order is intended to permit rate of return carriers to recover any lost support through the explicit support mechanism in the CAF, it remains unclear whether the CAF will provide the Company with the same level of support over time that the Company currently receives.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Board of Directors
Crockett Telephone Company, Inc.
Friendship, Tennessee

We have audited, in accordance with auditing standards generally accepted in the United States of American and the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of Crockett Telephone Company, Inc. (the Company) which comprise the balance sheet as of December 31, 2014, and the related statements of operations, changes in stockholder's equity and cash flows for the year then ended and the related notes to the financial statements, and have issued our report thereon dated April 30, 2015.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the Company's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

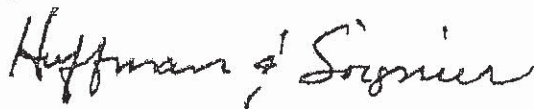

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Company's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control over financial reporting and compliance, and the results of that testing, and not to provide an opinion on the effectiveness of the Company's internal control over financial reporting or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Company's internal control over financial reporting and compliance. Accordingly, this report is not suitable for any other purpose.

INDEPENDENT AUDITORS' MANAGEMENT LETTER FOR TELECOMMUNICATIONS BORROWERS

Board of Directors
Crockett Telephone Company, Inc.

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards for financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Crockett Telephone Company, Inc. (the Company or the Borrower) which comprise the balance sheet as of December 31, 2014 and the related statements of operations and cash flows for the year then ended, and the related notes to the financial statements and have issued our report thereon dated April 30, 2015. In accordance with *Government Auditing Standards*, we have also issued our report dated April 30, 2015 on our consideration of the Company's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. No reports other than the reports referred to above and our schedule of findings and responses related to our audit and the Auditors' Required Communications with Those Charged With Governance have been furnished to management.

In connection with our audit, nothing came to our attention that caused us to believe that the Company failed to comply with the terms, covenants, provisions or conditions of their loan, grant and security agreements as set forth in 7 CFR Part 1773, *Policy on Audits of Rural Utilities Service Borrowers*, § 1773.33 and clarified in the RUS policy memorandum dated February 7, 2014, insofar as they relate to accounting matters as enumerated below. However, our audit was not directed primarily towards obtaining knowledge of noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding the Company's noncompliance with the above-referenced terms, covenants, provisions or conditions of the contractual agreements and regulatory requirements, insofar as they relate to accounting matters. Except as noted, in connection with our audit, we noted no matters regarding the Company's accounting and records to indicate that the Company did not:

Maintain adequate and effective accounting procedures;

Utilize adequate and fair methods for accumulating and recording labor, material and overhead costs, and the distribution of those costs to construction, retirement, and maintenance or other expense accounts;

Reconcile continuing property records to the controlling general ledger plant accounts;

Clear construction accounts and accrue depreciation on completed construction;

Record and properly price the retirement of plant;

Seek approval for the sale, lease or transfer of capital assets and disposition of proceeds for the sale or lease of plant, material or scrap;

Maintain adequate control over materials and supplies;

The Borrower has obtained written approval of the RUS to enter into any contract, agreement or lease with an affiliate as defined in §1773.33 (e)(2)(i);

The Borrower had no contracts with affiliates that would require approval of RUS during the year ended December 31, 2014.

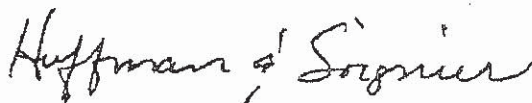

The Borrower has submitted its Form 479 to the RUS and the Form 479, Financial and Statistical Report, as of December 31, 2014, is in agreement with the Company's audited records in all material respects.

Disclose material related party transactions in the financial statements, in accordance with requirements for related parties in accounting principles generally accepted in the United States of America;

Comply with the requirements for the detailed schedule of investments; and,

The Company has no investments which would require presentation pursuant to 7 CFR 1773.33 (i).

This report is intended solely for the information and use of the board of directors, management, and the RUS and is not intended to be and should not be used by anyone other than these specific parties. However, this report is a matter of public record and its distribution is not limited.
